MPE'S SDM Degree College, Honnavar, Uttara-kannada

jul-2023

TECHNICAL PROFICIENCY

Frontend: HTML, CSS, React.js, JavaScript

Backend: Python, Java, C,C++, PHP, SQL, Web Applications

Database Management: SQL, MongoDB

ACADEMIC PROJECTS

1. AI-ADTECH PORTAL

Built an AI AdTech portal enabling users to create video advertisements from text prompts and product info. Implemented campaign workflows with automated ad topic generation and video creation using AI APIs. Delivered a full-stack solution using React (frontend) and PHP/MySQL (backend) for small business ad marketing.

2. Trip Margadarshak

Developed and launched a real-time, live tourism management platform to help users book tour packages efficiently .An online platform that allows tourists to browse and book tour packages without visiting offices. Users can track bookings, update profiles, and view tour history, while admins manage packages and customer data. Built with PHP, MySQL, PHP and JavaScript.

Research Paper

1. NLP-Based Digital Forensics for Email Spam Detection

Implemented a machine learning approach using Python to detect email spam for digital forensics.Developed and tested the model using Jupyter Notebook.

Machine Learning Approach to Email Content Digital Forensics", in Proceedings of the International Conference on Advance IT, Engineering and Management (SACAIM 2024, Volume – 2), Peer-Reviewed Edited Book, 2024.
